Sonavision's Newsletter

leading the way

So many cameras...which will you choose?

Our ever expanding range of Hawkeye Video Cameras now boasts a grand total of 26 different models.

(Memo to Development: okay guys - ease off a little now!).

Seriously, if you don't find the right underwater video camera for your particular application within our range - we'll develop one for you!

Why consider one of our Hawkeye Cameras?

- Well, we've got cameras in stainless steel, aluminium, titanium and acetal.
- Cameras rated for use at 300m, 600m, 1000m, 3000m or 6000m.
- We've got cameras for use on a drop frame, a dive helmet or an ROV.
- They can have either balanced line or composite output.
- We've got colour or black & white.
- All are small, well designed and manufactured to exacting standards.
- We use the most up to date CCD modules *(and will continue to use the latest components!)*.
- We've got a camera with bleed screw for de-pressurising after use in a helium filled environment.
- They're all modular so can be mixed and matched.
- They're easy to maintain and service.

And the best bit...they're reasonably priced and don't cost the earth!

**So...what are you waiting for?

Hawkeye 65CT Video Camera

Announcing New US RoxAnn GD Distributors

We're delighted to announce that RoxAnn GD has two new distributors in the US appointed recently at Hypack'06.

Measutronics Corp, of Lakeland Florida provide marine navigation, positioning and coastal surveying products and services.

Seafloor Systems Inc with bases in California and Washington State, provide solutions for hydrographic and oceanographic industries with products, rentals and services.

Our International Distribution Manager, Alasdair Murrie commented *"This represents an exciting new phase in the long history of RoxAnn and we are delighted to be working with two such highly respected US companies, who will promote, sell and support the new range of RoxAnn products to customers old and new."*

Both companies have been provided with rental and demonstrator RoxAnn equipment. For more info, contact:

John Tamplin
Seafloor Systems Inc.

Tel: +1 916 933 8085

Lou Nash Jr.
Measutronics Corp.
www.measutronics.com
Tel: + 1 863 644 2679

More...

GeoDAS - RoxAnn Link Available

Following agreement reached during OI'06, we are excited to announce that **GeoDAS-LT**, and **GeoDAS-PC**, produced by Oceanic Imaging Consultants, Inc. in Hawaii, supports **RoxAnn**. *(Right boss - we seriously believe a field trip is necessary!)*

When used as a stand-alone sensor, **GeoDAS-LT** supports reading the output of **RoxAnn** as the primary sensor in NMEA format. When used in conjunction with another sensor, such as a sidescan or multibeam, **GeoDAS-PC** supports reading output from RoxAnn as a standard Seabed Classification system, via the GeoDAS Meta-data inputs tool.

Founded in 1993 as a spin-off of research done for the Office of Naval Research at the University of Hawaii, OIC produces a wide range of hydrographic software systems.

For more information on integrating RoxAnn with GeoDAS, please contact Dr. Tom Reed on:

Tel: +1 (808)539-3706
Email: info@oicinc.com

We've just sold...

Hawkeye 65BT - our first multiple order for low light black and white titanium housed cameras which will be used on a pipeline burial plough.

RoxAnn GroundMaster GD-X - for survey work around oil and gas installations in the Caspian Sea.
(Read more about the RoxAnn GD-X in the next newsletter)

RoxAnn GD-A - for shallow water inland waterways survey in the US.

Mercury Sonar - to be fitted to a Benthos Stingray ROV.

Subcom 2000 - for delivery to in Middle East. Will be fitted to a refurbished DSV operating in India.

*Dr. Tom Reed
President, OIC Inc.*

RoxAnn Training Course in Florida, USA

An open training course on the operation of RoxAnn GD System will be held at Tampa, FL on 16th May '06.

Andy Williamson will deliver the course, which will cover basic theory, set-up & installation of equipment followed by actual field operation & post processing.

Did we mention it's free? *(Maybe just bring along some beer money for the lecturer!)*

It's being organised by Measutronics Corp. based in Lakeland, FL and if you're interested in participating, contact Lou Nash to reserve your space on:

Tel: (863) 644-8712
Email: Lou_Nash@measutronics.com
