*Lighting the Way  
at Cardiff Bay*

*4 Titans to the Gulf*

Our distributor in the Gulf of Mexico, APS LLC has placed an order for 4 of our new Titan sonar.

3 are going to a leading Gulf based diving company and APS will keep the 4th for their own use because they think it's great!

Although diminutive in stature, it's only 226mm by 90mm, TITAN packs a punch!

It's capable of ranges up to 300m and the only sonar of its size with the performance of a long-range, high-resolution sonar.

Here's Bob & Andy doing the harbour tests. Yes it is sunny! Amazing for NE Scotland. And YES, that is a pub(!) in the background.

As Bob said "It's thirsty work!"

*John & Roberta Silveti  
of APS LLC at Sonavision*

With 50+ years experience, APS LLC provide navigation and sonar solutions to the oil & gas industry and are the technical support centre in the Gulf for our entire sonar range.

For more information contact John D Silveti on:

*Woodsons*

*Appointed as Dealer*

We are delighted to announce that following the success of RoxAnn GD at the Fishing Show in Glasgow recently, **Woodsons of Aberdeen** are now the dealer for the system in the UK fishing industry.

*Steven Wood at Fishing 2005*

For more information on the system, please contact:

[sales@woodsons.co.uk](mailto:sales@woodsons.co.uk)

Underwater lighting equipment has been supplied to Cardiff Harbour Authority to allow scientists to monitor activity of fish.

There is a fish pass that runs alongside the locks at Cardiff Bay Barrage and it is here the fish will be monitored for numbers, health and species, as they swim up river to spawn.

The lighting, covering an area of 24 square metres, is diffused to avoid spotlighting and filtered to accentuate the outline of the fish. This makes it easier to recognise species and assess size.

The lighting is housed in 20 individual pressure housings allowing easy access for maintenance.

For more information contact:

[sales@sonavision.co.uk](mailto:sales@sonavision.co.uk)

*Arabian Nights (and Days!)  
for the SubCom 2000*

We've supplied a SubCom 2000 System to Oil & Natural Gas of India.

This is being installed onboard the **DSV Samudra Prabha**, a marine geophysical vessel operating in the Arabian Sea.

Like to find out more? Contact us!

## Submarine Safaris Using SubCom 2000

This fabulous submarine belongs to our customer, Submarine Safaris, Lanzarote, who use our **SubCom 2000 Through Water Communication System.**

*"We want to live in a Yellow Submarine!"*

Used world-wide for twenty years, the system provides a vital link in the event of an emergency or if there is a failure in the wired communications system.

*SubCom 2000 Surface Unit*

If you've got a spare moment(!?), check out their website:

### Dealers Wanted

**Interested in joining our international distributor network?**

**Contact Alasdair Murrie at:**

**[alasdair@sonavision.co.uk](mailto:alasdair@sonavision.co.uk)**

## Mercury Onboard 20 Vehicles!

We've just delivered a Mercury to Oceanering in Norway for installation onboard their Sea Owl vehicle.

This brings the total types of vehicle using our Mercury sonar to 20!

This was supplied through our Norwegian distributor, Lateral AS.

*Mercury Sonar*

Lateral is based in Stavanger and provide innovative expertise, specialising in transfer of technologies from a range of industries into the oil & gas industry.

*Petter Jensen of Lateral AS*

Petter says that he has a "Tool Box" of solutions for his clients.

For more information on Mercury, contact:

**[info@sonavision.co.uk](mailto:info@sonavision.co.uk)**

## Meet the Team

The other young blood on the team is Stewart MacDermid. Stewart studied Electronic & Electrical Systems at Robert Gordon University and has been involved in the offshore oil industry since then.

When he's not looking after all the service jobs, Stewart likes to indulge his passion for classic cars.

Get in touch with Stewart at:
